EDUCATION

Purdue University

May 2029

Bachelor of Science in Mechanical Engineering | Minor in Themed Entertainment Design

Awards: Presidential Merit Scholarship (2025-2029) | PSUB Emerging Leader of the Year (2025)

Relevant Coursework: Thermodynamics, Engineering Mechanics: Statics, Computer Graphics Technology for Mechanical Engineering

EXPERIENCE

Undergraduate Student Researcher

Aug 2026 – Present

Anasori Layered Materials & Structures Lab

Indianapolis, IN

- Prepare and process samples for high-entropy nitride MAX phase and MXene experiments evaluating material performance for mechanical and manufacturing applications.
- Developed an AI-assisted workflow that converts Materials Project graphs into Excel datasets for two material properties used in ongoing lab research, reducing manual data extraction from about one hour to five minutes.
- Maintain experimental documentation and follow standardized laboratory procedures to ensure reproducible results.

UUAA Student Academic Advising Ambassador

Aug 2026 – Present

Purdue University

Indianapolis, IN

- Provide customer service by assisting students, faculty, and visitors in a fast-paced advising office.
- Manage multiple appointment systems, maintain confidential records, and use Microsoft Office to support advising.

STEM Instructor Intern

Jun 2026 – Jul 2026

Lavner Education

Winter Park, FL

- Instructed classes of up to 15 K-8 students per week in 3D printing, modeling, and technology while troubleshooting hardware and technical challenges in real time.
- Exceeded course requirements across 3D printing, business, and technology classes.

PROJECTS

IoT Power Consumption Research: Battery Life Extension

Aug 2025 – May 2026

Purdue Vertically Integrated Projects | Allegion Industry Partnership

- Performed root cause analysis of IoT power consumption to evaluate four battery-life extension concepts.
- Served as liaison between the Purdue research team and Allegion engineers, coordinating three presentations each semester.

UN Countries History Explorer

April 2026

- Developed an interactive Python web application that displays historical facts for 193 UN-recognized countries, combining structured data with a browser-based user interface.
- Designed a responsive web interface with interactive graphics using Python.

Wind Turbine Blade Design

Jan 2025 – Mar 2025

- Designed, 3D printed, and tested three iterations of wind turbine blades created from scratch in Fusion 360, refining blade geometry after each round of testing.
- Evaluated blade thickness and blade angle using multimeter measurements to optimize voltage output.

ACTIVITIES & LEADERSHIP

Society of Women Engineers, Purdue Indianapolis

Jan 2026 - Present

Vice President of Professional Events

- Organize industry speakers, networking events, and technical workshops for engineering students' professional development.
- Collaborate with students, faculty, alumni, and industry professionals to expand chapter programming.

American Society of Mechanical Engineers, Purdue Indianapolis

Oct 2025 - Present

Secretary

- Strengthen operations for a 200+ member ASME chapter by documenting meetings, coordinating communications and event logistics, and representing the chapter at campus and inter-organization events.

Autodesk

Aug 2025 - Present

Design and Make Ambassador

- Mentor peers in Autodesk Fusion 360 and promote Autodesk through LinkedIn and campus outreach.

SKILLS

Manufacturing & Design: Autodesk Fusion 360 (Certified), Revit (Certified), 3D Printing, 3D Modeling, Iterative Design, Technical Drawings & Engineering Standards (ANSI/ASME, ISO), Siemens NX

Programming and Tools: Python, C, Excel, Microsoft Office, ArcGIS
