EDUCATION

Purdue University

Bachelor of Science in Mechanical Engineering | Minor in Themed Entertainment Design
Awards: Presidential Merit Scholarship (2025-2029) | PSUB Emerging Leader of the Year (2025).

Expected May 2029

EXPERIENCE

Undergraduate Student Researcher

Anasori Layered Materials & Structures Lab

Aug 2026 – Present

- Support research on high-entropy nitride MAX phases and MXenes by preparing metal and AlN materials and assisting with molten salt etching experiments.
- Maintained detailed experimental documentation and followed established molten salt etching and sample preparation to improve reproducibility and efficiency in materials synthesis.

UUAA Student Academic Advising Ambassador

Purdue University

Aug 2026 – Present

- Coordinated appointments, responded to student inquiries, maintained confidential academic records, and collaborated with advisors to deliver efficient student support.

STEM Instructor Intern

Lavner Education

Jun 2026 – Jul 2026

- Instructed classes of up to 15 K-8 students per week in 3D printing, modeling, and technology while troubleshooting hardware and technical challenges in real time.
- Exceeded project requirements across 3D printing, business, and technology classes, boosting learning outcomes by 50%.

IT Infrastructure Intern

Kelly Services / Orange County Public Schools

Jun 2023 – Jul 2023

- Imaged, configured, and quality tested 500+ student devices for district-wide deployment.

PROJECTS

IoT Power Consumption Research: Battery Life Extension

Purdue Vertically Integrated Projects | Allegion Industry Partnership

Aug 2025 – May 2026

- Performed root cause analysis of IoT power consumption to identify factors contributing to battery drain and evaluate four battery life extension concepts.
- Served as primary liaison between the Purdue research team and Allegion engineers, coordinating three progress presentations each semester, ensuring deliverables stayed on schedule.

Wind Turbine Blade Design

Designer

Jan 2025 – Mar 2025

- Designed, fabricated, and tested wind turbine blades in Fusion 360, analyzing performance data to maximize voltage output.

Micropipette Holder: Biomedical Department Support

Designer

Mar 2022

- Developed and tested micropipette holders in Fusion 360, adopted for continued reprinting as department demand grew.

ACTIVITIES & LEADERSHIP

Society of Women Engineers, Purdue Indianapolis

Vice President of Professional Events

Jan 2026 - Present

- Organize professional development programming by connecting students to industry speaker engagements and career readiness initiatives.

American Society of Mechanical Engineers, Purdue Indianapolis

Secretary

Oct 2025 - Present

- Maintain records for a 200+ member chapter and coordinate logistics for technical workshops and professional events.

Autodesk

Design and Make Ambassador

Aug 2025 - Present

- Mentor peers on parametric CAD workflows and promote Autodesk Fusion 360 through LinkedIn and campus outreach.

SKILLS

CAD, Manufacturing: Autodesk Fusion 360 (Certified), Revit (Certified), 3D Printing, 3D Modeling, Iterative Design

Data, Programming and Tools: Excel, PowerPoint, Python, C Programming, Microsoft Office, ArcGIS
