EDUCATION

Purdue University

Bachelor of Science in Mechanical Engineering | Minor in Themed Entertainment Design.

Expected May 2029

Awards: Presidential Merit Scholarship (2025-2029) | PSUB Emerging Leader of the Year (2025).

EXPERIENCE

STEM Instructor Intern

Jun 2026 – Jul 2026

Lavner Education

- Instructed 15 K-8 students per week in 3D printing, modeling, and technology while troubleshooting hardware and technical challenges in real time.
- Exceeded project requirements across 3D printing, business, and technology classes, boosting learning outcomes by 50%.

Youth Design Partner

Jul 2024 – Present

InTandem

- Delivered user-centered design feedback to 5+ partner organizations, driving content updates including simplified website language to improve youth accessibility.

IT Infrastructure Intern

Jun 2023 – Jul 2023

Kelly Services / Orange County Public Schools

- Prepared 500+ student devices for on-time deployment by performing device imaging and quality assurance checks before deployment.

PROJECTS

IoT Power Consumption Research: Battery Life Extension

Aug 2025 – May 2026

Purdue Vertically Integrated Projects | Allegion Industry Partnership

- Performed root cause analysis of IoT power consumption to identify factors contributing to battery drain and evaluate four battery life extension concepts
- Demonstrated strong written and verbal communication skills while serving as primary liaison to Allegion engineers, coordinating 3 progress presentations per semester to maintain deliverable timelines.

Wind Turbine Blade Design

Jan 2025 – Mar 2025

Designer

- Mechanical design and fabrication of wind blades in Fusion 360 to maximize voltage output within defined constraints.
- Applied critical thinking to evaluate blade performance, interpret test results, and refine designs to meet target specifications

Environmental GIS Analysis: Wastewater and Nutrient Runoff

Summer 2024

Florida Scholars Capstone Research

- Produced 3 ArcGIS mapping analyses correlating wastewater facility proximity, demographics, and nitrogen concentrations to support environmental policy research.
- Led a 3-student team to synthesize geospatial outputs into advocacy briefs, published as an interactive map (arcg.is/1PTTL4).

Micropipette Holder: Biomedical Department Support

Mar 2022

Designer

- Developed and tested micropipette holders in Fusion 360, adopted for continued reprinting as department demand grew.

ACTIVITIES & LEADERSHIP

Autodesk

Aug 2025 - Present

Design and Make Ambassador

- Mentor peers on parametric CAD workflows and promote Autodesk Fusion 360 through LinkedIn and campus outreach.

Society of Women Engineers, Purdue Indianapolis

Jan 2026 - Present

Vice President of Professional Events

- Lead professional development programming by organizing industry speaker engagements and career readiness initiatives.

American Society of Mechanical Engineers, Purdue Indianapolis

Oct 2025 - Present

Secretary

- Maintain records for a 50+ member chapter and coordinate logistics for technical workshops and professional events.

SKILLS

CAD, Design and Fabrication: Autodesk Fusion 360 (Certified), Revit (Certified), 3D Printing, 3D Modeling, Iterative Design

Data, Programming and Tools: ArcGIS, Excel, PowerPoint, Python, C, Microsoft Office

Soft Skills: Adaptability, Communication, Team Collaboration, Composure Under Pressure, Problem-Solving, Technical Documentation
